

markdown2impress

What is markdown2impress?

markdown2impress is script to convert *markdown* into presentation using *impress.js*.

How to use?

1. Write markdown.
2. Run **markdown2impress.pl**, then generate 'js/impress.js', 'css/impress.css' and 'index.html'.

```
% markdown2impress README.md
```

Slide Dividing rule

Each slide is divided into sections.

'data-*' attribute rule

'data-*' attribute for impress.js represent HTML comment.
This comment must be write in seccion.

```
<!-- data-x="2400" -->  
<!-- data-y="3000" -->  
<!-- data-z="-100" -->  
<!-- data-scale="10" -->  
<!-- data-rotate="90" -->
```

markdown2impress assume and calculate default x,y, if you do not specify this.

See [impress.js](#) manual for details.
